Hydrobiologia

The International Journal on Limnology and Marine Sciences

Contents

Volume 389

A new *Keratella* from Patagonia
by B.E. Modenutti, M.C. Diéguez & H. Segers 1–5

Application of photorespiration concepts to whole stream productivity
by K.L. Parkhill & J.S. Gulliver 7–19

The effect of sieve mesh size on the abundance and composition of macrophyte-associated macrofaunal assemblages
by M.O. Tanaka & F.P.P. Leite 21–28

Reproduction of river and lake populations of *Hyridella depressa* (Unionacea: Hyriidae) in New South Wales: implications for their conservation
by M. Byrne 29–43

The first record of the genus *Helobdella* (Hirudinoidea: Glossiphoniidae) from Australia, with a description of a new species, *Helobdella papillornata*
by F.R. Govedich & R.W. Davies 45–49

Contrasting impact of small dams on the macroinvertebrates of two Iberian mountain rivers
by R.M.V. Cortes, M.T. Ferreira, S.V. Oliveira & F. Godinho 51–61

Longitudinal and temporal variation in the hydrochemistry of streams in an Irish conifer afforested catchment
by C. Clenaghan, J. O'Halloran, P.S. Giller & N. Roche 63–71

Stream community structure in relation to spatial variation: the influence of mesohabitat characteristics
by J.-N. Beisel, P. Usseglio-Polatera, S. Thomas & J.-C. Moreteau 73–88

The importance of qualitative inventory sampling using electric fishing and nets in a large, tropical river (Brazil)
by T. Penczak, L.C. Gomes, L.M. Bini & A.A. Agostinho 89–100

Phytoplankton responses to grazing by *Daphnia galeata* in the biomanipulated Bautzen reservoir
by W.J. Böing, A. Wagner, H. Voigt, T. Deppe & J. Benndorf 101–114

The faunal communities of upland streams in the eastern region of Ireland with reference to afforestation impacts
by D. Tierney, M. Kelly-Quinn & J.J. Bracken 115–130

Cementation in the freshwater bivalve family Corbiculidae (Mollusca: Bivalvia): a new genus and species from Lake Poso, Indonesia
by A. Bogan & P. Bouchet 131–139

Effects of pumping and floods on groundwater quality: a case study of the Grand Gravier well field (Rhône, France)
by L. Mauclaire & J. Gibert 141–151

Loss-on-ignition estimates of organic matter and relationships to organic carbon in fluvial bed sediments
by R.A. Sutherland 153–167
Simultaneous occurrence of denitrification and nitrate ammonification in sediments of the French Mediterranean Coast
by P. Bonin, P. Omnes & A. Chalamet 169–182
Oligochaete drift in a large river (French Upper Rhône): the effect of life cycle and discharge
by B. Cellot & J. Juget 183–191
Influence of physical and chemical factors on the larval abundance of *Neurothemis tullia* (Drury) (Odonata:Libellulidae) in a rain-fed rice field
by M.R. Che Salmah, S.T.S. Hassan, A. Abu Hassan & A.B. Ali 193–202
Spatial distribution and short-term changes of benthic macrofauna in Lake Balaton (Hungary)
by A. Specziár & P. Bíró 203–216
